SUMMARY

I never imagined I'd end up in the world of web development, but here I am—and I love it. I studied Geomatics and Surveying Engineering, but life took me down a different path. I spent almost eight years working in factories, a demanding job that taught me discipline, problem-solving, and teamwork. But along the way, I realized something: I'm passionate about building things that people can see and use.

My first experience with coding was back in university, working on small HTML projects (nothing to brag about, honestly), though I am proud of a big MATLAB project I worked on. If you're curious about it, I'd be happy to tell you over a coffee. At the time, I didn't see programming as a career path, but I was always drawn to problem-solving and creating solutions.

A while ago, I decided to fully commit to frontend development. I started learning on my own, following tutorials, building real projects, facing (a lot of) errors, and understanding how web technologies work. Today, I'm skilled in HTML, CSS, and JavaScript, among other tools, and I enjoy creating functional and visually appealing interfaces. I'm looking for my first opportunity in the IT field to keep growing, learn from experienced professionals, and contribute with my eagerness to do things right. If you're looking for a self-taught, adaptable, and motivated developer, here I am.

PROJECTS

Check out my github profile for more projects: <https://github.com/jpiedra181>
Or my website: jpiedra.com

Discord Clone Website (html + tailwind + javascript)
<https://jpiedra181.github.io/discord-app-clone/>

ToDo App Website (astro + html + tailwind + javascript + figma)
https://jpiedra181.github.io/App_ToDo/

Ecommerce Website (html + tailwind + javascript + API)
<https://jpiedra181.github.io/ecommerce/>

Foodie App Mobile (figma)
<http://bit.ly/3XWkQ75>

SKILLS

HTML & CSS
Tailwind
Git & Github

JavaScript
Astro

React (learning)
Figma

ADDITIONAL INFORMATION

Languages: Spanish, English
